DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: I-IV which relate to the embodiments disclosed in Figures 1-4 and the Figure in the upper left quadrant of Figure 5 (embodiment I) and the other three Figures of Figure 5 (embodiments II-IV). The species are independent or distinct because they represent different structural electrodes. It is noted that independent claims 1 and 15 are directed to the embodiment in the lower left quadrant of Figure 5 while claim 20 is directed to the embodiment disclosed in the upper right quadrant of Figure 5. Features of the other embodiments are set forth in claims dependent upon claims 1 and 15 (claims 6, 7, 9, 10, 12, 16, and 17). These dependent claims appear to be improper since the features recited therein were not originally disclosed to be elements of the embodiment of claims 1 and 15.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are deemed to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 3739

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lee S. Cohen whose telephone number is 571-272-4763. The examiner can normally be reached on Monday-Friday, 7:00-3:30.
